

FACULTY OF MEDICINE

> Through knowledge, creating health

Assistant Professor, Grant Tenure Track Pediatric Infectious Diseases, BC Children’s Hospital & Child & Family Research Institute

The Division of Infectious and Immunological Diseases, Department of Pediatrics, University of British Columbia and the Immunity in Health & Disease cluster at the Child & Family Research Institute seeks a clinician/scientist at the Assistant/Associate Professor level to join their well established program. The candidate should have MD and PhD or equivalent research experience and be qualified to practice as a Pediatric infectious diseases consultant.

The incumbent will be expected to establish an active independent program in infectious diseases or immunology research and to forge productive collaborations with other members of the division. His or her time will be well protected to allow establishment of a vibrant research program. The division currently consists of ten full-time faculty members with expertise in microbial pathogenesis, vaccine evaluation, innate and neonatal immunology, HIV infection & correlates of protection and clinical immunology. We are seeking a junior to mid-level clinician-investigator who can complement the current expertise or introduce a new focus for research.

The incumbent will have a track record of demonstrated excellence in teaching as well as documented excellence in research.

The Child and Family Research Institute (CFRI) (www.cfri.ca) is a partnership of The University of British Columbia (UBC) and the Provincial Health Services Authority (PHSA) whose member agencies include the BC Children’s Hospital, Sunny Hill Health Centre for Children, and the BC Women’s Hospital and Health Centre. The CFRI is dedicated to high quality research spanning a wide range of concerns relevant to children’s and family health.

The successful candidate will have a track record of demonstrated excellence in teaching, superb clinical credentials and documented excellence in research as documented by publications and grants from external peer-reviewed granting agencies. She or he will be expected to participate in the clinical and educational programs of the Division of Infectious and Immunological Diseases as well as be eligible to obtain a specialist’s license to practice in British Columbia. Candidates will have Royal College of Physicians and Surgeons of Canada certification in Pediatrics (or equivalent) as well as Fellowship training in Pediatric Infectious Diseases.

The successful candidate will be appointed as a member of the full-time faculty. Salary and rank will be commensurate with qualifications and experience. This is a full-time grant tenure track appointment and is subject to final budgetary approval. Applications from experienced candidates seeking a more senior UBC rank will be considered. The anticipated start date for this position is April 1, 2012.
