
Graduate Student Positions Open
Experimental Medicine Program
University of British Columbia, Vancouver, Canada
<http://cfri.ca/levingslab>

The Levings laboratory, based at the Child and Family Research Institute (CFRI) and the University of British Columbia in Vancouver, Canada invites applications from students interested in graduate studies related to the biology and clinical applications of regulatory T cells. Prospective students should be completing a BSc in a relevant program, have maintained an excellent academic record and have previous experience in working in a research laboratory. The position requires exemplary interpersonal, communication, coordination and organization skills, proven team/collaborative skills within a laboratory setting, and excellent problem solving abilities.

As one of the leading Universities in Canada, the student will be exposed to both the translational research at the CFRI and the strong academic environment of the University of British Columbia. In addition, Vancouver is a vibrant city that has been consistently ranked as one of the most liveable cities in the world.

Please submit a letter of application, curriculum vitae, a statement of areas of expertise and strengths, and the names of three references to:

Megan Levings, PhD
Child and Family Research Institute
A4-186, 950 West 28th Ave; Vancouver, BC V5Z 4H4
