

**Postdoctoral Research Fellow**  
**Immunity in Health and Disease Program**  
**Child and Family Research Institute**  
**University of British Columbia, Vancouver, Canada**  
<http://cfri.ca/levingslab>

The Levings laboratory, based at the Child and Family Research Institute (CFRI), at BC Children's Hospital at the University of British Columbia in Vancouver, Canada invites applications for a Postdoctoral Research Fellow to join a research team investigating the biology and clinical applications of regulatory T cells. The project will involve research in small animal models and human subjects. The successful applicant will be trained in a field of biomedical science that is relevant to the focus of this project. The position requires exemplary interpersonal, communication, coordination and organization skills, proven team/collaborative skills within a laboratory setting, and excellent problem solving abilities.

As one of the leading research centres in Canada, the research fellow will be exposed to both the translational research at the CFRI and the strong academic environment of the University of British Columbia. In addition, Vancouver is a vibrant city that has been consistently ranked as one of the most liveable cities in the world.

This position will commence as soon as possible. It is a one-year term appointment, with potential for annual renewal for up to 4 years. Salary will be commensurate with qualifications and experience.

Please submit a letter of application, curriculum vitae, a statement of areas of expertise and strengths, and the names of three references to:

Megan Levings, PhD  
Child and Family Research Institute  
A4-186, 950 West 28th Ave; Vancouver, BC V5Z 4H4
